### Online Safety - Parental Responsibility Reminder

There have been a number of incidents regarding online safety, which have taken place **not in school but at home**. Please be reminded that it is parental responsibility that you ensure and know how to keep your child/children safe online and that they are monitored when they are at home.

The following Apps - YouTube, Snapchat, WhatsApp and Tik Tok, have a minimum age of 13 in the UK.

There is no age restriction on Roblox. However, it is not safe for 7 year olds and under, due to the risks of inappropriate content. A parent must actively use the parental controls to manage the experience, such as restricting interactions and monitoring in-game purchases, and should be aware that many of the millions of user-generated games are not age-rated and may not be suitable.

## ROBLOX

Please see attached the separate focus sheets on the above Apps and if you require further information about parental controls for games and apps, please visit the following website:
